

Patient-Reported Arthralgia Inventory (PRAI) Scoring Manual [applies to PRAI Version 2.0]

1. Sum responses to all answered questions. Sum will be an integer ranging from 0 to 160.
2. Divide the sum from step 1 by the number of answered questions (out of 16). Final score will range from 0 to 10 and can be a decimal. Avoid using rounded scores in subsequent interim mathematical and/or statistical operations.
